BRETT HUMPHREYS

Senior / Staff Frontend Engineer | Engineering Manager
La Vernia, TX (San Antonio metro) | Open to remote (US) | 210-627-1967 | brett.e.humphreys@gmail.com | linkedin.com/in/humphreysbrett
Retired U.S. Army Major | Former TS/SCI (through Apr 2024)

SUMMARY

Hands-on frontend leader and retired U.S. Army Major (U.S. citizen, former TS/SCI). Led frontend for the Parler and PlayTV social media platforms across web, iOS, and Android (TypeScript, React, Vue.js), owning the whole client from design through production. Turned a one-person web codebase into a shared client the wider team ships on, unified web and mobile on one API and UI contract so features ship once, and set the code review and quality bar the team executes against while leading about 14 engineers and contractors. Earlier built and ran Parler's moderation system end to end, and brings 20 years of Army leadership, including U.S. Army North CBRNE planning with FEMA and federal partners, test programs up to $6M, and briefing senior executives.

CORE SKILLS

Frontend: React, Next.js, Vue 3 (Composition API, Pinia, Vue Router), Ionic, Vuetify, Tailwind CSS, shadcn/ui, TanStack Query, PWAs (Workbox), Sentry, Stripe; Frontend Architecture, Design Systems and Reusable Component Libraries, Figma-to-Code, Accessibility (WCAG 2.x, Section 508), Responsive Web/Mobile UI, Shared API/UI Contracts; CMS: WordPress, SharePoint
Languages: TypeScript, JavaScript, Dart, Go, PHP, C#, HTML/CSS, SQL
Mobile: React Native, Flutter (Bloc, Provider, go_router, Dio/Retrofit, Firebase Cloud Messaging, in-app purchases), Capacitor (iOS/Android), .NET MAUI
Testing, Build and Delivery: Vitest, Vue Test Utils, Playwright, MSW, flutter_test; Vite, esbuild, pnpm workspaces, ESLint, Prettier; AI-assisted development (Cursor); GitHub Actions CI/CD, Docker, iOS/Android/web release pipelines
Technical Leadership: Scoping and Technical Design, Code Review and Quality Standards, Codebase Ownership and Knowledge Sharing, Product and Roadmap Planning
Backend and Data: API contract design and integration with Laravel/PHP and Go backends; Go (net/http, GORM, PostgreSQL, Redis); real-time via Laravel Echo/Pusher; IndexedDB (Dexie)
People and Program Leadership: Team Leadership (100+ people), Training and Mentoring, Cost/Schedule/Risk Management, Executive Briefing
Trust and Safety: Content Moderation Systems, Policy Design, Operator Tooling and Dashboards, Crisis Response, Cross-functional Work with Product, Legal, and Engineering

PROFESSIONAL EXPERIENCE

Intent Media Group | VP of Engineering, Frontend **Jan 2026 – Present**
United States | Early-stage venture | Vue 3, TypeScript, Vuetify, Capacitor, .NET MAUI
- Built mobile and web clients for a club platform with Vue 3, TypeScript, Vuetify, and Capacitor, plus a .NET MAUI app with Maestro mobile tests and iOS/Android release CI.

Parler / Sovren | Lead Frontend Engineer **Aug 2025 – Oct 2026**
United States | Vue.js, TypeScript, React, React Native, Flutter, Go, PHP/Laravel | Web and mobile clients for Parler and PlayTV
- Led frontend for the Parler and PlayTV social media platforms across web, iOS, and Android, managing 8 frontend engineers and 6–8 offshore contractors; owned the full client from design through production.
- Turned a single-maintainer web codebase into a shared client the whole team ships on, spreading code ownership from 85% to 64% without fragmenting the stack.
- Established one API and UI contract across web and mobile so features ship once instead of drifting between platforms; owned client contracts against Laravel/PHP and Go backends.
- Helped lead the migration from Vue to React/React Native on a Go backend while keeping the Flutter apps shipping.
- Set the team’s code review and quality standards, folding bug and performance fixes into the main delivery cycle.

Radiance Lux Technologies LLC | Lead Mobile Engineer (Contract) **Nov 2023 – Present**
United States | Flutter/Dart, Firebase, GitHub Actions
- Primary engineer on the Genuine Flutter app for iOS, Android, and web (about 4,200 of 5,300 commits): Bluetooth LE, in-app purchases, Firebase messaging and storage, and GitHub Actions release pipelines for all three platforms.

Closed Circuit Inc. | Lead Frontend Developer **Apr 2023 – Aug 2025**
United States | Vue 3, JavaScript, Pinia, Ionic, Vite, Vitest, Playwright
- Built the Vue 3 web client that the new Parler acquired and adopted as its production web app.

Parlement Technologies (original Parler) | Architect & Head of Moderation Systems **Jun 2020 – Apr 2023**

Nashville, TN | Full-time | Vue.js, PHP/Laravel | Role ended when the company ceased operations

- Rebuilt moderation systems (15M users at peak) that restored the app's Apple App Store listing after its 2021 removal.
- Built and ran Parler's moderation system end to end: the policies, the community jury workflow, and the tools operators used to enforce them.
- Partnered with engineering to build operator tools and automation behind human review, including dashboards used in time-sensitive cases.
- Led the community jury and set the bar for review quality, throughput, and policy compliance; trained jurors and kept external moderation partners aligned to the same standard.
- Wrote moderation policy and procedure with product, legal, and policy teams, then turned it into a workflow people could actually run.
- Used review data to spot emerging abuse patterns (incitement, threats, automated spam) and reprioritize what the team and tools targeted.
- Ran crisis response on sensitive content: stakeholder calls, cross-functional decisions, and the resulting product and tooling changes.

U.S. Army | Major (Retired) **2004 – 2024**

20 years of service; enlisted combat medic to commissioned officer, retired April 1, 2024

- **CBRNE Deputy (Deputy Lead, CBRNE Operations), U.S. Army North (Nov 2022 – Mar 2024):** Led the command's preparedness and response planning for chemical, biological, radiological, nuclear, and explosive (CBRNE) threats and domestic natural disasters, partnering with FEMA, other federal agencies, and international partners; oversaw hurricane response readiness.
- **Acting Director / Test Officer, U.S. Army Test and Evaluation Command (Nov 2021 – Dec 2022):** Led a team of up to 100 personnel at remote locations worldwide; managed operational test programs valued at $600K–$6M, owning cost, schedule, performance, and risk; wrote test plans, protocols, and reports to verify products met quality and safety standards; coordinated with program managers and vendors; briefed senior executives (general officers and Senior Executive Service).
- **Division CBRNE Deputy, 2nd Infantry Division / ROK-US Combined Division, Korea (Aug 2020 – Sep 2021):** Planned and executed four division-level and multinational exercises with U.S. and Korean partners; developed new policies and procedures to improve operational effectiveness.
- **Company Commander, Installation Management Command HQ (May 2018 – Aug 2020):** Led a team of 89 soldiers and over 600 civilians across command staff sections and globally dispersed personnel; accountable for $40M in organizational property; ran training programs to keep the team's skills current.
- **CBRN Operations Officer, U.S. Army North and 2nd Combat Aviation Brigade, Korea (Jul 2016 – May 2018):** Advised senior leaders on CBRN readiness; coordinated support across federal agencies and commands; briefed monthly readiness to brigade leadership.
- **Operations Officer / Training Manager, Civil Support Training Activity (Aug 2012 – Jan 2016):** Managed training for specialized response teams, including 54 Weapons of Mass Destruction Civil Support Teams, 17 enhanced response force packages, and 10 Homeland Response Forces; managed individual training for 85 civilian and military staff and developed new training programs and courses.
- **Combat Medic, Specialist to Staff Sergeant (Jan 2004 – Aug 2012):** NCO in charge of a cardiology clinic (led EMR rollout); led a USAMRIID vaccine protocol team; deployed to Iraq (2005–2006) as a line medic, 101st Airborne.

PROJECTS

- **PR Genie** (github.com/radiancelux/prgenie, 2026): Developer tool for reviewing AI coding-agent work locally before it reaches GitHub: git-native local pull requests on worktrees, a CLI, a VS Code/Cursor extension, and an MCP plugin. TypeScript monorepo (pnpm, esbuild) with GitHub Actions CI.
- **VerifyChain.AI** (github.com/radiancelux/verifychain-ai, 2026): Content-provenance service: SHA-256 fingerprinting, Ed25519 creator identities, and an append-only Merkle ledger that issues verifiable certificates and embeddable badges. Go backend (GORM, PostgreSQL/SQLite) with a Vue 3, TypeScript, and Pinia frontend; Docker and GitHub Actions CI/release.

EDUCATION, BOARD SERVICE & CERTIFICATIONS

B.S., Health Sciences – Healthcare Management, Trident University International (Cum Laude) | Board Member, Homeland Security Foundation of America, Sep 2023 – Present

Certifications: HazMat Technician, Operations, PPE, and Awareness; Radiological Packaging | **Awards:** Army Commendation Medal (2), Army Achievement Medal (2)
